

EDUCA: Education for Development, Upgrade Children in Action

International Workshop Subject: Documentation

1

Reggio Emilia, 6th-9th May, 2013

Reggio Emilia will host an International workshop from the 6th to the 9th May 2013, part of the Educa Project, and it will be set up on “the documentation of educational projects” theme. Teachers, pedagogists and educational professionals, coming from two of the sister cities involved in this project, will participate to the workshop.

The main theme will be deepened through a work and a consideration “on the field” which will lead the delegation to directly know the city’s educational contexts regarding the age group 3/14.

It will be an exchange, training and analysis opportunity for the development of competences and tools which will be useful to introduce and narrate the pilot actions. They are intended to qualify the educational policies, both for the citizens community and for the local administrators.
